CITY OF MONROE

## SEPA ENVIRONMENTAL CHECKLIST

### ***Purpose of checklist:***

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

### ***Instructions for applicants:***

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

### ***Instructions for Lead Agencies:***

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

### ***Use of checklist for nonproject proposals:***

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

**A. Background**

1. Name of proposed project, if applicable:

Monroe West

---

2. Name of applicant:

South Lake Ridge, LLC

---

3. Address and phone number of applicant and contact person:

10515 20th ST SE Lake Stevens, WA 98258

---

Attn: Ryan Larsen 360 631-1820

---

4. Date checklist prepared:

June 2, 2025

---

5. Agency requesting checklist:

City of Monroe

---

6. Proposed timing or schedule (including phasing, if applicable):

Site Construction to start between September 2025 to May of 2026. Home construction to begin after that and may continue into 2027 or 2028 depending on market conditions.

---

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

No future additions or expansions.

---

---

---

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

No wetlands or streams on site per letter from Wetland Resources. See Geotech report by Terra Associates that states the site does not have Geological critical areas.

---

---

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

Yes - The property was rezoned to a more dense zone as part of the regular comprehensive plan update from the R4 to R7 zoning..

10. List any government approvals or permits that will be needed for your proposal, if known.

Preliminary Plat approval, SEPA, Construction plan approval for site improvements and utility extensions, FPA permit, NPDES permit, building permit for retaining walls and vaults, building permits for the proposed homes and Final Plat.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

Proposed plat of 39 lots with associated site improvements that include public roads, private access tracts utilities on and off-site along with clearing, grading and removal of timber. Once Final plat is recorded 39 homes will be constructed.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

Parcel: 28063600200600 and 28063600101300 at 18614 and 18718 -134TH ST SE, MONROE, WA 98272-9702. See attached vicinity map and site plan.

**B. Environmental Elements**

**1. Earth**

a. General description of the site:

(circle one): Flat, rolling (hilly) steep slopes, mountainous, other:

Site sloes from the NE to the SW.

b. What is the steepest slope on the site (approximate percent slope)?

21% per the geotech report by Terra Associates.

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Glacial Till

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Approximately 9 acres and 24,500 CY Cut to 33,900 CY Fill

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. Unlikely if all required erosion control BMP's are followed during construction as required by the NPDES permit that will be obtained for the site.

- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Approximately 55% of the site will be covered with impervious surfaces.

- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:  
Follow all required erosion control and storm water measures.

\_\_\_\_\_  
\_\_\_\_\_

**2. Air**

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Typical of 39 lot plat for construction and when completed

\_\_\_\_\_  
\_\_\_\_\_

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

None to our knowledge.

\_\_\_\_\_

- c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Follow all required building code requirements as well as watering site in the dry weather to keep dust down.

**3. Water**

- a. Surface Water:

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None per letter from Wetland Resources.

\_\_\_\_\_  
\_\_\_\_\_

- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No

\_\_\_\_\_  
\_\_\_\_\_

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None

---

---

---

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No

---

---

---

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No

---

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No

---

---

---

b. Ground Water:

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No

---

---

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

No

---

---

---

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Mitigate stormwater as required in a stormwater vault and provide water quality treatment in a filter vault. Will discharge into the City storm system to the west of the site.

2) Could waste materials enter ground or surface waters? If so, generally describe.  
Water is not being infiltrated

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.  
No. Will collect and discharge into City system.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

Vault will be designed and installed to retain water to meet the discharge requirements.

**4. Plants**

a. Check the types of vegetation found on the site:

- X deciduous tree: alder, maple, aspen, other
- X evergreen tree: fir, cedar, pine, other
- X shrubs
- X grass
- X pasture
- crop or grain
- Orchards, vineyards or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

b. What kind and amount of vegetation will be removed or altered?  
Much of the existing vegetation will be removed and landscaping will be replanted.

c. List threatened and endangered species known to be on or near the site.  
None to our knowledge

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:  
Some native landscaping will be used.

e. List all noxious weeds and invasive species known to be on or near the site.

Typical blackberries are on site.

**5. Animals**

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds, hawk, heron, eagle, songbirds, other:  
mammals: deer, bear, elk, beaver, other:  
fish: bass, salmon, trout, herring, shellfish, other \_\_\_\_\_

b. List any threatened and endangered species known to be on or near the site.

None to our knowledge

c. Is the site part of a migration route? If so, explain.

Part of the pacific flyway as all of the NW is.

d. Proposed measures to preserve or enhance wildlife, if any:

Will provide 2.4 acres of open space.

e. List any invasive animal species known to be on or near the site.

None

**6. Energy and Natural Resources**

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Electric and Possible natural gas will be used for heating etc. Will meet all current building codes.

b. Would your project affect the potential use of solar energy by adjacent properties?

If so, generally describe.

No

d. What kinds of energy conservation features are included in the plans of this proposal?

List other proposed measures to reduce or control energy impacts, if any:

Meet current building codes.

**7. Environmental Health**

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None to our knowledge

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None to our knowledge

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None to our knowledge

4) Describe special emergency services that might be required.

None to our knowledge

5) Proposed measures to reduce or control environmental health hazards, if any:

None

**b. Noise**

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Evergreen Speedway

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Typical construction noise and then typical noise as from a neighborhood.

3) Proposed measures to reduce or control noise impacts, if any:

Follow work hours.

**8. Land and Shoreline Use**

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Single family on site and surrounded by single family neighborhoods.  
\_\_\_\_\_  
\_\_\_\_\_

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No  
\_\_\_\_\_

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No

c. Describe any structures on the site.

Two single family homes and associated outbuildings  
\_\_\_\_\_

d. Will any structures be demolished? If so, what?

All buildings will be demolished  
\_\_\_\_\_

e. What is the current zoning classification of the site?

R7  
\_\_\_\_\_

f. What is the current comprehensive plan designation of the site?

Residential 1  
\_\_\_\_\_

g. If applicable, what is the current shoreline master program designation of the site?

N/A  
\_\_\_\_\_

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No  
\_\_\_\_\_

i. Approximately how many people would reside or work in the completed project?

Approximately 117 will live on site

---

j. Approximately how many people would the completed project displace?  
Approximately 6 people

---

k. Proposed measures to avoid or reduce displacement impacts, if any:  
Property bought from residence

---

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:  
Follow required zoning codes

---

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:  
N/A

---

**9. Housing**

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.  
39 middle to high income homes

---

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.  
2 middle to high income homes will be eliminated

---

c. Proposed measures to reduce or control housing impacts, if any:  
Property was purchased

---

**10. Aesthetics**

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?  
Max allowed under zoning code and material will be standard home siding material as used in the adjacent neighborhoods.

---

b. What views in the immediate vicinity would be altered or obstructed?  
None

---

e. Proposed measures to reduce or control aesthetic impacts, if any:  
Follow zoning code

---

**11. Light and Glare**

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?  
Limited potentially from new windows.

---

b. Could light or glare from the finished project be a safety hazard or interfere with views?

No

---

c. What existing off-site sources of light or glare may affect your proposal?

None

---

d. Proposed measures to reduce or control light and glare impacts, if any:

None

---

**12. Recreation**

a. What designated and informal recreational opportunities are in the immediate vicinity?

City owned property at the intersection of 191st Ave SE and 134th ST SE.

---

b. Would the proposed project displace any existing recreational uses? If so, describe.

No

---

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

Will provide 2.4 acres of open space on site

---

**13. Historic and cultural preservation**

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

No

---

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No

---

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

Will follow inadvertent discovery plan

---

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

N/A

---

**14. Transportation**

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Will extend public roads off of 134th ST SE

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No

- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

Will provide approximately 156 parking stalls will eliminate approximately 8

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Frontage improvements to 134th ST SE and on site new public roads

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

The there approximately 349 average daily trips w approximately 26 AM peak and 35 PM peak hour trips. Institute of Transportation Engineers' (ITE) Trip Generation, 11th Edition (2021)

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No

- h. Proposed measures to reduce or control transportation impacts, if any:

Pay mitigation fees

**15. Public Services**

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Will require typical serves as needed for a standard neighborhood

- b. Proposed measures to reduce or control direct impacts on public services, if any.

Pay mitigation fees are required

**16. Utilities**

- a. Circle utilities currently available at the site:

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system,

other \_\_\_\_\_

- f. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.  
Power Sno PUD, Fiber Zibley and Comcast, Natural Gas PSE, Storm, Water and Sewer City of Monroe. Off-site Storm and Sewer to the SW.

**C. Signature**

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Ryan C. Larsen

Name of signee Ryan C. Larsen

Position and Agency/Organization VP Land Development - Land Pro Group, Inc.

Date Submitted: 6/2/25

***D. Supplemental sheet for nonproject actions***

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

Proposed measures to avoid or reduce such increases are:

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

3. How would the proposal be likely to deplete energy or natural resources?

Proposed measures to protect or conserve energy and natural resources are:

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Proposed measures to protect such resources or to avoid or reduce impacts are:

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.
